To whom it may concern, I benefit from XM Satellite Radio for a variety of reasons. #1, I don't lose signal as I travel across this great Nation of ours, and I can listen to the same channel everywhere I go. #2. I PAY for this service so it is nobody else's business whether or not I listen to "Local Radio" or not. I have the power of the on-off switch and the control dial, and it is NONE of the National Association of Broadcasters business to dictate to ME what and where I get my Radio Entertainment, or for that matter, my Airway supplied services. Please do not let them sway you into thinking that they should have a monopoly on Radio. That Dog won't Hunt!!

Sincerely,
Michael E. Polan
